30" Stainless Steel Square Drop In Pan With 18" Ring

A warm, roaring fire glass display is just what your customers need to add some excitement to their next outdoor get together. The fire will warm the surroundings while the fire glass dazzles your customers and their visitors, becoming the focus of all conversations. However, in order to organize a truly awesome fire glass display your customers will need the right equipment; this includes our 30" square drop-in fire pit burner pan!

Maximizes the Magic, Minimizes the Fire Glass

Our 30" square drop-in burner pans come with a convenient lip so that they can easily be inserted into your customers' square fire pit and then removed after use. Fire pit pans give fire pits a false bottom which significantly reduces the amount of fire glass your customers will need for their display because the pans create the illusion that the entire fire pit is full of fire glass, whereas only the top portion of it is. Your customers get an amazing fire display with minimal fire glass!

Burner Ring Included

We also include an 18" ring burner so there is no need to buy any additional parts. The 18" Fire Ring is rated at 147,000 Btu and is made from 304 stainless steel. Our high quality 18" fire pit ring burner is designed to delight all onlookers with its amazing flame. The double concentric ring design increases the overall diameter of the burner, allowing for a truly realistic and evenly distributed flame. Furthermore, the burner holes have been drilled, not punched, which means no whistling noises are produced. Our burner also comes with a convenient ½ inch gas inlet for easy connection to a natural or propane gas supply.

Extremely Durable & User Friendly

Made of 304 stainless steel, our 30" square drop-in burner pans are extremely durable and have been designed to withstand extreme heat and harsh weather without sustaining any damage or rust. Each pan comes with built-in weep holes to prevent water accumulation and is also fitted with a

convenient 1/2" nipple for easy attachment to a propane or natural gas supply.

All that remains is to fit a burner atop the square drop-in pan, throw on some fire glass and ignite the flames for a mesmerizing spectacle!

(Please note: For propane applications, a propane air mixer is required)

30" Stainless Steel Square Drop In Pan With 18" Ring Ring

1. **Dimensions:** 30" Long x 30" Wide x 2" Deep
