1/2" Black Luster Fire Glass 2.0

Black Fire Glass is back and better than ever. Fire Glass 2.0 is specifically engineered with a luster finish on all 6 sides; this means your fireplace or fire pit will encompass the perfect amount of shimmer and shine. Our Black Fire Glass 2.0 is sure to please in any environment. Rather you use fire glass indoors in your fireplace or outdoors in a fire pit, it will stand up to the test of time.

A Practical Alternative to Ceramic Logs & Stones

Black Fire Glass 2.0 isn't just lovely to behold, it is also very practical. It does a wonderful job of covering the entire floor of a fire feature, effectively hiding the unseemly pipes and tubes that are often visible in gas fireplaces and fire pits. This makes fire glass a more desirable alternative to the often seen ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

All our fire glass is made of high quality tempered glass which has been manufactured via a unique 5-step process that renders its beautiful shine and allows it to withstand harsh weather and temperatures of up to 1300 degrees Fahrenheit without sustaining any damage or discoloration. Under normal conditions, this amazing product could last your customers a lifetime!

Another advantage of fire glass is that it does not emit any harmful chemicals, smoke, soot, or ash; thus it hardly requires any cleaning and is very easy to maintain!

If your customers like the idea of having gems in their fire feature, show them our 1/2" Black luster fire glass 2.0.
