1/2" Gray Fire Glass

Some people say gray is boring, but we beg to differ. Gray exudes calm and tranquility. Though it is not glamorous, it has an undeniable quiet elegance to it. If your customers are looking for something graceful for their decor, introduce them to our gray fire glass from our 1/2" inch fire glass collection.

Similar to our 1/4" gray fire glass, this version is larger and chunkier, allowing for better air circulation and delivering a more impressive flame. Gray fire glass is beautiful on its own, but may also be used as a wonderful base color, which will help to accentuate other colors. It will blend seamlessly with any color scheme and décor style. Whether your customers have a classic or contemporary theme to their living or entertainment area, our 1/2" gray fire glass will add a touch of elegance and vibrancy to it.

A Practical Alternative to Ceramic Logs & Stones

Our gray fire glass is not just exquisite to behold, it is also very practical. It does a wonderful job of covering the entire floor of a fire feature, concealing the unseemly pipes and tubes which are often visible in gas fireplaces or fire pits. This makes fire glass a more desirable alternative to the more common ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

All our non-tumbled tempered fire glass is manufactured using a unique 5-step process that renders it great strength, heat resistance, and a brilliant shine. It has been designed to withstand temperatures as high as 1300 degrees without losing its color, shine, or shape. Under normal conditions, this amazing product could last your customers a lifetime!

Another advantage of fire glass is that it does not give off any smoke, soot, or ash so it is extremely easy to maintain. Thus your customers will be able to spend more time enjoying their gray fire glass and less time cleaning it!

Let your customers bring elegance to their home with our 1/2" gray fire glass!

1/2" Gray Fire Glass Specifications

Material: Non-tumbled, color-infused tempered glass processed to perfection

Type: Non Reflective

Color: Gray

Use: In fire bowls, fire pits, and fireplaces

Size: 1/2 inch thick

Heat Rating: Higher temperature when compared to logs, lava rocks, stones, etc.

Quality Control: Stringent multi-step QC process at our factory in the USA

Cleaning: Easy cleaning, Rinse with vinegar and water (50:50) as required

Maintenance: Remove any kind of debris before lighting - HIGHLY RECOMMENDED

Jar vs Bag: The only difference is the packaging. The fire glass is the exact same. Jars are typically used to display in stores & bags are mostly used for shipping direct.

Est. Arrival: This product qualifies for same day shipping*. Click [here](#) for more details.
