1/2" Gold Reflective Fire Glass

Imagine a bright red and yellow fire, burning near a treasure chest full of gold. Imagine the flames dancing upon and reflecting off the golden coins, playing upon the walls and ceilings of the room. What a spectacular effect! Now, your customers can replicate this effect in their own fireplace with our 1/2" gold reflective fire glass!

Whether used indoors or outdoors, our gold reflective fire glass is sure to impress even the most critical audience as it gleams and glitters under a bright fire. The reflective edges of the glass will further enhance the experience, completely transforming the ambiance and becoming the focus of all conversations. Gold fire glass works well in environments of any color, complementing dark shades and providing a beautiful contrast to light tones.

A Practical Alternative to Ceramic Logs & Stones

Our 1/2" gold reflective fire glass is not just gorgeous to behold, it is also very practical. It does a great job of completely covering the entire floor of a fire feature, effectively hiding the unseemly pipes and tubes which are often visible in gas fireplaces or fire pits. This makes fire glass a much more preferable alternative to the more common ceramic logs and fire stones.

Extremely Durable, Safe & Long Lasting!

With American Fire Glass' high quality fire glass, your customers can rest assured that they are acquiring a product that is safe to use and will last for years to come. Made of non-tumbled tempered glass, our gold reflective fire glass is designed to withstand harsh weather and temperatures of up to 1300 degrees Fahrenheit without losing its shape or color, and without cracking. Under normal conditions, this amazing product can last your customers a lifetime!

Furthermore, our fire glass releases no harmful chemicals, smoke, soot, or unwanted residue, which means your customers will be able to spend more time enjoying the display and hardly any time cleaning up!

If your customers want to show off their wealth, our 1/2" gold reflective fire glass is what they want!
