## Light Blue Medium Fire Pit Glass

Blue is a splendid color! It's the color of the sky in daylight, the vast ocean, blue jays, denim jeans and blue berries. You simply can't go wrong with the color blue... and your customers just can't go wrong with our light blue medium fire pit glass!

Made from recycled glass, these lovely 1/2" to 1" glass pieces are as cool and pleasing to eye as light blue can be. Especially suited to outdoor pool areas, when added to your customers' fire feature they will immediately have an effect on their surroundings whether the fire is lit or not. Similar to our light blue small fire pit glass, this medium variety is chunkier, allowing for better air circulation and delivering a bigger, more impressive flame. When the fire pit is ignited the flames will appear to dance above the beautiful glass which in turn will shine and reflect the color of the fire, enchanting all onlookers and garnering a fair share of compliments.

### Not Just for Beautifying Fire Pits!

Even if your customers do not own a fire pit, they can still use our light blue fire pit glass to beautify their outdoor scenery. It can be used in gardens for landscaping, near pool areas, or even in aquariums! This dazzling glass may be used alone, or combined with other complimentary shades of fire pit glass for a truly unique look.

### Practical, Safe & Long Lasting!

But our fire pit glass is more than just pretty, it is also very practical. It not only beautifies its surroundings, but also does a great job of completely covering the floor of a fire feature, hiding those unseemly pipes that are often visible in gas fire pits. This makes it a much more desirable alternative to the more common ceramic logs and stones.

All of our fire pit glass has been carefully designed to withstand extreme temperatures and harsh weather without any damage or discoloration. Our tempered fire glass is not tumbled which ensures

an enhanced shine. Used correctly, this amazing product can last a lifetime!

One other major advantage of fire pit glass is that it does not emit any smoke, soot, ash, or harmful chemicals. This means it requires hardly any cleaning and is very easy to maintain!

Encourage your customers to go blue! Introduce them to our light blue medium fire pit glass.

## Light Blue Medium Fire Pit Glass Specifications

**Material:** Color-infused tempered, not tumbled, fire glass engineered to perfection

**Color:** Light Blue

**Use:** In outdoor fire bowls, fire pits, and fireplaces
