Onyx Medium Fire Pit Glass

Onyx is no ordinary material, but the stuff of legends. Tales of this mysterious and beautiful stone date back to Greek mythology. It was prized and used extensively by many ancient civilizations including the Romans and Egyptians for making jewelry and carvings. Now, we have succeeded in capturing some of the beauty of onyx in our fire glass so that your customers can bring its exotic features to their homes...

Our onyx medium fire pit glass may be described as dark, elegant, mysterious and exotic all at once! Made from recycled glass, these gleaming black fire glass pieces are guaranteed to impress all onlookers with their opaque luster. Ideal for any outdoor environment, this magnificent glass is especially suited to backgrounds of light shade which will contrast with its stunning black. This medium variety is chunkier as compared with our onyx small fire pit glass, which allows for better air circulation and also delivers a bigger and more impressive flame. When your customers' fire pit is lighted, all eyes will stare in wonder at the amazing display as the dark black fire glass shines and reflects the bright yellow flames dancing above it.

Not Just for Beautifying Fire Pits!

Even if your customers do not own a fire pit, there are still many uses for our onyx medium fire pit glass to enhance the look of their outdoor scenery. It may be used in aquariums, near water features, or in gardens for landscaping. Our onyx fire pit glass may be used alone, or combined with other complementing colors to create a truly unique look.

Practical, Safe & Long Lasting!

Our fire pit glass is not just beautiful, but also very practical. It does a wonderful job of covering the entire bottom surface of a fire feature, thereby hiding the unseemly pipes and tubes that are often visible in gas fire pits. This makes them a much more desirable alternative to the more common ceramic wood and stones.

All of our fire pit glass has been carefully designed to withstand extreme temperatures and harsh weather without sustaining any damage or discoloration. Our tempered fire glass is not tumbled which ensures an enhanced shine. Used correctly, it could last your customers a lifetime!

- **Material** Color-infused tempered, not tumbled, fire glass engineered to perfection
- **Quality Control:** Stringent multi-step QC process at our factory in the USA
- **Cleaning:** Easy cleaning, Rinse with vinegar and water (50:50) as required
- **Maintenance:** Remove any kind of debris before lighting - HIGHLY RECOMMENDED
- **Warranty:** [Lifetime Limited Warranty](#)
